Re: KalshiEX LLC – CFTC Regulation 40.6 Notification Regarding the Amendment of the "What will be the highest earthquake magnitude recorded during <period>?" Contract

Dear Sir or Madam,

Pursuant to Section 5c(c) of the Commodity Exchange Act and Section 40.6 of the regulations of the Commodity Futures Trading Commission, KalshiEX LLC (Kalshi) hereby notifies the Commission that it is amending the "What will be the highest earthquake magnitude recorded during <period>?" contract (Contract).

This contract is a straight-forward modification to the previous "What will be the highest earthquake magnitude recorded during <period>?" contract. The changes are as follows:

1. **Removal of the requirement that earthquakes have a status of "reviewed," and exclusion of events USGS deletes or withdraws before Expiration**
2. **Resolution to the last fair price if no data is available by the Expiration Date**
3. **Use of the primary magnitude displayed in the USGS event header, regardless of magnitude type**

Along with this letter, Kalshi submitted the following documents:

- A clean copy of the amended Contract
- A red-lined copy of the original Contract

If you have any questions, please do not hesitate to contact me.

Sincerely,

Xavier Sottile
Head of Markets
KalshiEX LLC
xsottile@kalshi.com

KalshiEX LLC
Official Product Name: "What will be the highest earthquake magnitude recorded during <period>?"
Rulebook: BIGGESTQUAKE
Summary: Highest earthquake magnitude during specified period
Kalshi Contract Category: Other Event
Kalshi Internal Category: World
November 10, 2026

CONCISE EXPLANATION AND ANALYSIS OF THE PRODUCT AND ITS COMPLIANCE WITH APPLICABLE PROVISIONS OF THE ACT, INCLUDING CORE PRINCIPLES AND THE COMMISSION'S REGULATIONS THEREUNDER

Pursuant to Commission Rule 40.2(a)(3)(v), the following is a concise explanation and analysis of the product and its compliance with the Act, including the relevant Core Principles (discussed in Appendix D), and the Commission's regulations thereunder.

I. Introduction

The "What will be the highest earthquake magnitude recorded during <period>?" Contract is a contract relating to World.

Further information about the Contract, including an analysis of its risk mitigation and price basing utility, as well as additional considerations related to the Contract, is included in Confidential Appendices B, C, and D.

Pursuant to Section 5c(c) of the Act and CFTC Regulations 40.2(a), the Exchange hereby certifies that the listing of the Contract complies with the Act and Commission regulations under the Act.

General Contract Terms and Conditions: The Contract operates similar to other event contracts that the Exchange lists for trading. The minimum price fluctuation is $0.01 (one cent). Price bands will apply so that Contracts may only be listed at values of at least $0.01 and at most $0.99. Further, the Contract is sized with a one-dollar notional value and has a minimum price fluctuation of $0.01 to enable Members to match the size of the contracts purchased to their economic risks. As outlined in Rule 5.12 of the Rulebook, trading shall be available at all times outside of any maintenance windows, which will be announced in advance by the Exchange. Members will be charged fees in accordance with Rule 3.6 of the Rulebook. Fees, if they are charged, are charged in such amounts as may be revised from time to time to be reflected on the Exchange's Website. A new Source Agency can be added via a Part 40 amendment. All instructions on how to access

the Underlying are non-binding and are provided for convenience only and are not part of the binding Terms and Conditions of the Contract. They may be clarified at any time. Furthermore, the Contract's payout structure is characterized by the payment of an absolute amount to the holder of one side of the option and no payment to the counterparty. During the time that trading on the Contract is open, Members are able to adjust their positions and trade freely. The Expiration Value and Market Outcome are determined at or after Market Close. The market is then settled by the Exchange, and the long position holders and short position holders are paid according to the Market Outcome. In this case, "long position holders" refers to Members who purchased the "Yes" side of the Contract and "short position holders" refers to Members who purchased the "No" side of the Contract. If the Market Outcome is "Yes," meaning that an event occurs that is encompassed within the Payout Criterion, then the long position holders are paid an absolute amount proportional to the size of their position and the short position holders receive no payment. If the Market Outcome is "No," then the short position holders are paid an absolute amount proportional to the size of their position and the long position holders receive no payment. Specification of the circumstances that would trigger a Market Outcome of "Yes" are included below in the section titled "Payout Criterion" in Appendix A.

CERTIFICATIONS PURSUANT TO SECTION 5c OF THE COMMODITY EXCHANGE ACT, 7 U.S.C. § 7A-2 AND COMMODITY FUTURES TRADING COMMISSION RULE 40.2, 17 C.F.R. § 40.2

Based on the above analysis, the Exchange certifies that:

- ❏ The Contract complies with the Act and Commission regulations thereunder.
- ❏ This submission (other than those appendices for which confidential treatment has been requested) has been concurrently posted on the Exchange's website at https://kalshi.com/regulatory/filings.

Should you have any questions concerning the above, please contact the exchange at ProductFilings@kalshi.com.

Appendix C (Confidential) - Source Agency
Appendix D (Confidential) - Compliance with Core Principles

APPENDIX A – CONTRACT TERMS AND CONDITIONS

Official Product Name: “What will be the highest earthquake magnitude recorded during <period>?”
Rulebook: BIGGESTQUAKE

BIGGESTQUAKE

Scope: These rules shall apply to this contract.

Underlying: The Underlying for this Contract is the highest earthquake magnitude as measured and reported by the United States Geological Survey (USGS) for earthquakes occurring during <period>. Revisions to the Underlying made after Expiration will not be accounted for in determining the Expiration Value.

Instructions: The Underlying can be found at: https://earthquake.usgs.gov/earthquakes/search/. These instructions on how to access the Underlying are provided for convenience only and are not part of the binding Terms and Conditions of the Contract. They may be clarified at any time.

Source Agency: The Source Agency is the United States Geological Survey (USGS).

Type: The type of Contract is an Event Contract.

Issuance: After the initial Contract, Contract iterations will be listed on an as-needed basis at the discretion of the Exchange and corresponding to the risk management needs of Members.

<magnitude>: <magnitude> refers to earthquake magnitude values specified by the Exchange. May be expressed as single values, ranges, or thresholds (e.g., "exactly 6.5", "6.5 or higher", "between 6.0 and 6.9"). Magnitudes are expressed to one decimal place unless otherwise specified.

<period>: <period> refers to a time period specified by the Exchange. May include single days, weeks, months, years, or custom date ranges. Always includes specific start and end times in UTC. "During" means an earthquake's origin time must fall within the period boundaries, inclusive of both endpoints.

<date>: <date> refers to a calendar date specified by the Exchange. The Exchange may list iterations of the Contract corresponding to variations of <date>.

<time>: <time> refers to a time on a calendar date specified by the Exchange. The Exchange may list iterations of the Contract corresponding to different statistical periods of <time>.

<location>: <location> refers to a specific geographic region specified by the Exchange, which may include countries, U.S. states, or other defined regions.

Payout Criterion: The Payout Criterion for the Contract encompasses the Expiration Values that the highest magnitude earthquake recorded by USGS with an origin time during <period> is <magnitude>.

The determining magnitude is the primary magnitude displayed in the event header on the USGS Earthquake Catalog as of <date> at <time>, regardless of magnitude type. Only earthquakes with:

- Origin time falling within <period> boundaries in UTC
- Epicenter within <location> boundaries (if location is specified)

are considered.

Special provisions:

- For the avoidance of doubt, the magnitude of the earthquakes will be USGS-reported magnitude value as of <time> on <date>; revisions made after <time> on <date> will not be considered.
- If USGS reports multiple magnitude types for a single earthquake, the primary magnitude displayed in the event header is used
- If multiple earthquakes have identical magnitudes, all are considered to have achieved that highest magnitude
- Events that USGS deletes or withdraws before Expiration are not considered, even if displayed on <date> at <time>
- Only earthquakes in the USGS ComCat (Comprehensive Catalog) database are considered
- Magnitude values are considered to the precision displayed by USGS (typically one decimal place)
- If no earthquake meeting the criteria above is displayed on the USGS Earthquake Catalog on <date> at <time>, the Payout Criterion is evaluated as though no such earthquake occurred, provided the USGS Earthquake Catalog was accessible on <date> at <time>.
- In cases where the USGS Earthquake Catalog is unavailable, inaccessible, or otherwise fails to load on <date> at <time> such that the Exchange cannot confirm whether an earthquake meeting the criteria in the Payout Criterion has occurred, the Contract shall resolve on the first data available after <time> on <date> and by the Expiration Date. If no data is available by the Expiration Date, all Contracts shall resolve to the last fair price as determined by the Exchange in its sole discretion.

Examples that would resolve to "Yes" for "exactly 7.0":

- A single earthquake with a primary USGS magnitude of 7.0 occurs during <period>
- Multiple earthquakes occur with the highest having a primary USGS magnitude of 7.0

Examples that would NOT resolve to "Yes" for "exactly 7.0":

- Highest earthquake has a primary USGS magnitude of 6.9 or 7.1

- An earthquake with a primary USGS magnitude of 7.0 occurs outside <period> boundaries
- Another agency reports 7.0 but USGS reports 6.9

Minimum Tick: The Minimum Tick size for the Contract shall be $0.01.

Position Accountability Level: The Position Accountability Level for the Contract shall be $25,000 per strike, per Member.

Last Trading Date: The Last Trading Date of the Contract will be the end of <period>. The Last Trading Time will be the same as the end time of <period>.

Settlement Date: The Settlement Date of the Contract shall be no later than the day after the Expiration Date, unless the Market Outcome is under review pursuant to Rule 7.1.

Expiration Date: The latest Expiration Date of the Contract shall be one week after the final day of <period>. If an event described in the Payout Criterion occurs, expiration will be moved to an earlier date and time in accordance with Rule 7.2.

Expiration time: The Expiration time of the Contract shall be 10:00 AM ET.

Settlement Value: The Settlement Value for this Contract is $1.00.

Expiration Value: The Expiration Value is the value of the Underlying as documented by the Source Agency on the Expiration Date at the Expiration time.

Contingencies: Before Settlement, Kalshi may, at its sole discretion, initiate the Market Outcome Review Process pursuant to Rule 7.1 of the Rulebook. If an Expiration Value cannot be determined on the Expiration Date, Kalshi has the right to determine payouts pursuant to Rule 7.1 in the Rulebook.
